Together for Cvijeta: A Letter of Solidarity and Support to ULUS

To whom it may concern,

This letter is to express the support of the curatorial team gathered around the international platform PhD In One Night - a research platform for aesthetic education and experimentation *for all*. As a collective of artists, thinkers, and amateurs of art from different disciplines and countries, we recognize the paramount function of the art pavilion Cvijeta Zuzorić for the cultural and artistic life of Belgrade and Serbia.

Not only is the art pavilion historically relevant to the national history of the country; its prestige regularly attracts the contributions of international artists who wish to participate in its programs. For its ability to speak to an international audience, ULUS had decided to open the curation of its 86th Autumn Exhibition to a nationally diverse curatorial team.

For all these reasons, the curatorial team gathered internationally recognised artists for this 86th Autumn exhibition who responded to the invitation and expressed solidarity with the demands of Ulus.

To enable further development of these contemporary relevant and internationally-oriented activities, we demand the Ministry of Culture and the Government of the Republic of Serbia to urgently resolve the issue of the status and condition of the Art Pavilion "Cvijeta Zuzorić," under the conditions of ULUS, showing solidarity with the ongoing struggle of all Ulus members.

Warm regards,

The curatorial team on behalf of PhD In One Night
